Day 2: Photosynthesis Checklist

Day 02 · From Lectures/photosynthesis-lecture.pdf · 2026-11-07

Learning Checklist for Day 2

- State the primary organelle where photosynthesis takes place in plant and algal cells.
- Write the complete balanced overall equation for photosynthesis.
- Describe the events of the light-dependent reactions in the thylakoid membranes, including chlorophyll absorption and photolysis.
- Explain the roles of RuBisCO, RuBP, ATP, NADPH, and G3P in the Calvin cycle within the stroma.
- List the three factors that can limit the rate of photosynthesis.
